

MOHD FARAZ LARI

DevOps Tech Lead | 11 Years Experience | AWS Certified Solutions Architect – Associate

+1 (437) 661-3006 | lari.faraz01@gmail.com | [linkedin](#) | [larifaraz.github.io](#) | Toronto, ON, Canada

PROFESSIONAL SUMMARY

Results-driven DevOps Tech Lead with 11 years of IT experience designing, automating, and operating enterprise-scale cloud platforms on AWS. Currently leading multi-account DevOps operations at TCS for a major airline client, overseeing ECS, EKS, Lambda, and RDS environments. Deep expertise in Kubernetes platform engineering, Harness CI/CD pipeline automation, Infrastructure as Code (Terraform / CloudFormation), cloud cost optimisation, and AI-powered internal tooling. Proven track record of reducing production incidents, eliminating manual toil, and accelerating delivery velocity across complex, regulated environments.

CORE COMPETENCIES

AWS Core & Networking	EKS, ECS, Lambda, EC2, EFS, S3, Route53, Cloudfront, VPC, VPN, Security Groups, NACL, LoadBalancers
Container & Orchestration	Kubernetes (EKS), Redhat OpenShift, ECS, Docker, Helm, kubectl
CI/CD & Automation	Harness CI/CD, GitHub Actions, ArgoCD, Jenkins, BitBucket Pipelines, AWS CodePipeline
Infrastructure as Code	Terraform, OpenTofu, AWS CloudFormation, CDK
AI & Copilot Tools	Amazon Bedrock, GitHub Copilot, Microsoft Copilot, OpenAI, Anthropic Claude
Scripting & Development	Python (Boto3), Bash, YAML, React (dashboards)
Databases	Amazon Aurora MySQL, PostgreSQL
Security & Observability	OrcaSecurity, SonarQube, AWS Trusted Advisor, CloudWatch, Grafana, Dynatrace, Splunk
Collaboration and ITSM	Jira, Confluence, ServiceNow
Source Code	GitHub, GitLab, BitBucket

AI & AUTOMATION PROJECTS

Harness CI/CD Insights Dashboard *Python · Harness REST APIs · React*

- ▶ Built a live internal dashboard consuming Harness REST APIs to surface org-wide KPIs — total Organisations, Projects, Pipelines, Executions, Delegates in a single pane-of-glass view; adopted by engineering leads as the primary pipeline health monitor.
- ▶ Replaced time-consuming manual API queries with auto-refreshing metrics; surfaced orphaned pipelines, improving hygiene and reducing Harness licence overhead by eliminating unused resources.

CDK Diff Visualiser Dashboard *AWS CDK · Python · Harness Pipelines · React*

- ▶ Integrated directly into Harness approval-gate pipelines — captures CDK Diff step output and renders a colour-coded CloudFormation change dashboard (additions, modifications, deletions) before any deployment triggers.
- ▶ Real-time diff visibility at the approval gate eliminated manual log inspection and significantly reduced production incidents caused by unintended infrastructure drift across environments.

AI-Augmented Infrastructure Automation *GitHub Copilot · Amazon Bedrock · OpenAI · Terraform*

- ▶ Integrated Amazon Bedrock-powered Lambda into CI pipelines to auto-review Terraform plans and flag security misconfigurations before apply, providing automated guardrails across multiple AWS accounts.
- ▶ Leveraged GitHub Copilot to accelerate Terraform module authoring and Harness pipeline YAML generation, reducing IaC development time and improving code quality across the team.

PROFESSIONAL EXPERIENCE

DevOps Tech Lead*Dec 2021 – Present*

Tata Consultancy Services (TCS) | Toronto, ON, Canada

- ▶ Lead DevOps operations for a major airline client across multiple AWS accounts and domains (ECS, EKS, Lambda, RDS), ensuring platform stability, security, and cost efficiency at enterprise scale for a 24/7 production environment.
- ▶ Architected and maintain multi-environment AWS infrastructure using Terraform and OpenTofu, achieving full Infrastructure as Code coverage across multi environments reducing infrastructure spend by 30%.
- ▶ Designed and deployed Amazon EKS clusters from scratch to host multiple production microservices workloads; manage cluster health, node scaling, version upgrades, and troubleshooting via kubectl and Helm CLI.
- ▶ Architected and maintained ArgoCD-driven GitOps deployment pipelines across multiple ROSA clusters, enabling centralized application lifecycle management and zero-touch deployments.
- ▶ Built and maintain end-to-end Harness CI/CD pipelines for CDK, Serverless, ECS, and Terraform deployments; configured Harness Cloud Manager and Kubernetes Delegates on EKS for scalable, continuous delivery.
- ▶ Accelerated IaC delivery using GitHub Copilot and Amazon Bedrock — automated Terraform plan review in CI pipelines and streamlined Harness YAML generation, cutting IaC authoring time significantly.
- ▶ Provisioned and operated Amazon MSK (Managed Streaming for Kafka) clusters; administered Kafka topics, consumer groups, and purge operations for high-throughput, low-latency data streaming workloads.
- ▶ Drove cloud cost optimisation initiatives using AWS Trusted Advisor across multiple accounts, identifying underutilised resources and eliminating spend waste, delivering measurable cost reductions.
- ▶ Managed Amazon RDS clusters with RDS Proxy configuration; administered Aurora MySQL and PostgreSQL — database creation, schema management, and IAM-based user privilege administration.
- ▶ Enforced cloud and code security posture using OrcaSecurity and SonarQube, integrating scan results into CI pipelines for shift-left security across all deployments.
- ▶ Prepared Setup and troubleshooting confluence documents for future references. Trained and mentored 6 Junior engineers and enabled them to handle workload seamlessly.

Senior DevOps Specialist*May 2021 – Dec 2021*

Cognizant India Pvt Ltd | Pune, India

- ▶ Led migration of CI/CD pipelines from on-premises Jenkins to GKE-hosted Jenkins on Google Kubernetes Engine, reducing infrastructure overhead and improving pipeline scalability and reliability.
- ▶ Standardised pipeline templates across teams, improving consistency and reducing time-to-deploy for new services onboarded to the platform.

DevOps / ML Engineer*Apr 2020 – May 2021*

HashedIn Technologies Pvt Ltd | Bengaluru, India

- ▶ Automated AWS infrastructure provisioning using Terraform and CloudFormation across multiple client environments; delivered end-to-end DevOps solutions with standardised CI/CD frameworks.
- ▶ Designed AWS Glue ETL pipelines (CSV to Parquet) to reduce S3 storage costs; configured AWS Data Pipeline for large-scale data migration between AWS services, improving data engineering efficiency.

Senior Analyst – IT Infrastructure*Sep 2019 – Apr 2020*

Dell-EMC Pvt Ltd | Bengaluru, India

- ▶ Provisioned and supported private cloud infrastructure for multiple enterprise clients, maintaining high availability, SLA compliance, and incident response across virtualized environments.

Service Delivery Specialist*Sep 2014 – Sep 2019*

IBM India Pvt Ltd | Bengaluru, India

- ▶ Provisioned end-to-end AWS infrastructure from scratch — compute (EC2), networking (VPC, subnets, security groups), and storage (S3, EBS) — for multiple enterprise clients using Terraform and CloudFormation.
- ▶ Gained foundational DevOps and cloud engineering experience across 5 years, working with diverse enterprise clients and building expertise in infrastructure automation, ITIL service delivery, and incident management.

EDUCATION & CERTIFICATIONS

AWS Certified Solutions Architect – Associate *Amazon Web Services*

B.Tech – Electronics & Communication Engineering with 70% from PTU, Punjab, India | 2010-2014
